Built for Indian homes.

Monsoon rain, summer heat, dust and busy roads. Every IndiGreen window and door is chosen and built to handle them, and to look good while it does.

01

Monsoon-tight

Drainage channels and rubber seals keep driving rain outside where it belongs.

02

Cooler, calmer rooms

Multi-chamber frames and double glazing help cut heat and street noise.

03

No rust, rot or termites

Frames need only a wipe. No repainting, no warping, no wood to eat.

04

Secure by design

Reinforced frames, multi-point locking and toughened glass options.

05

Made to measure

Every opening is surveyed and every unit is built to its exact size.

06

Kinder to the planet

uPVC and aluminium are both recyclable and built to last for years.

Quality profiles, factory built.

IndiGreen windows and doors use proven uPVC and aluminium profile systems, fabricated at our manufacturing partners' factories. Each unit is made to your measured sizes, checked before dispatch, then fitted by trained installers.

Windows

Four styles to suit every room. All available in uPVC or aluminium, in your choice of finish.

Sliding window

Glides along a track and takes no room to open. A smart fit for balconies, bedrooms and tighter spaces.

2 or 3 track | Mosquito mesh | Space saving

Casement window

A hinged sash that swings open for the most airflow and closes tight against dust and rain.

Side or top hung | Multi-point lock | Best airflow

Tilt and turn window

Tilts open for safe everyday airing, or turns fully inward for big ventilation and easy cleaning.

Two-way opening | High security | Easy to clean

Fixed picture window

A wide pane that frames the view and fills the room with daylight.

Large glass | Slim frame | Acoustic option

Images are for illustration. Sizes, glass and finishes are made to order. Ask our team for the best option for each room.

Doors

Open up your home. Four door styles, from wide glass walls to a strong front entrance.

Sliding door

Wide glass panels on a heavy-duty track that open your living room to the balcony, deck or garden.

2 to 4 panels | Large spans | Low threshold option

French door

Classic double-leaf doors with a clear, graceful opening for patios and terraces.

Double leaf | Grid or plain glass | Multi-point lock

Slide and fold door

Panels fold and stack to one side so an entire wall opens up. Made for verandas and entertaining.

3 to 7 panels | Stacks away | Wide openings

Entrance door

A strong, well-insulated front door with real presence. Pivot or hinged, with smart-lock options.

Reinforced frame | Pivot or hinged | Smart lock ready

Images are for illustration. Sizes, glass and finishes are made to order. Ask our team for the best option for each room.

Choose what suits each room.

uPVC or aluminium, in the glass, finish and hardware you prefer.

uPVC

Best for insulation and everyday value

- Excellent thermal and sound insulation
- Tight seals against dust and rain
- Low maintenance, no repainting
- Ideal for bedrooms and noisy roads

Aluminium

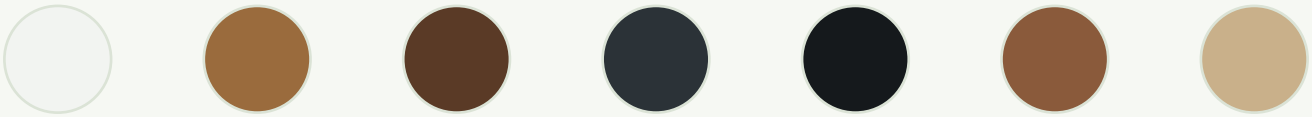

Best for slim lines and large openings

- Slimmer frames and more glass area
- Strong for wide sliding and folding doors
- Wide range of colours and wood-look finishes
- Ideal for living rooms, balconies and villas

Glass options

Single glass | Double glazed | Toughened | Laminated | Low-E | Frosted

Frame finishes

White | Golden oak | Walnut | Anthracite | Matte black | Wood look | Champagne

Hardware and extras

- Multi-point locking
- Concealed hinges
- Restrictor hinges for child safety
- Grills
- Lockable handles
- Friction hinges for folding doors
- Mosquito mesh
- Smart locks for entrance doors

Availability of finishes, glass and hardware varies by style and material. Our team will confirm options for your project.
